

ADVANCED MWD & LWD WITHOUT THE MAJOR-SERVICE MODEL.

High-end tools.
Veteran hands.
Better economics.

TECHNOLOGY IS ONLY AS GOOD AS THE PEOPLE RUNNING IT

Every MWDS field professional brings 10+ years of field experience, with advanced MWD/LWD technology deployed by people who already know the equipment and the application.

MIN FIELD
EXPERIENCE

10+ YEARS

MWD
LEADERSHIP

18+ YEARS

Corey brings 18+ years of MWD experience spanning field operations, management, and executive leadership. That experience drives MWD Solutions today, from technology selection and operations to troubleshooting and customer support.

BUILT FOR MORE THAN BASIC MWD

MWD Solutions delivers a broad, modern downhole technology stack spanning pressure, formation evaluation, near-bit intelligence, and directional drilling systems such as RSS, with configurations built around the well rather than a fixed equipment package.

TELEMETRY

THE ADVANTAGE ISN'T ONE TOOL

IT'S THE OPERATING MODEL

Operators are usually forced to trade advanced capability for cost, or lower cost for technical depth.

THE OPERATOR SHOULD NOT HAVE TO CHOOSE BETWEEN
BETTER TECHNOLOGY AND BETTER ECONOMICS

BUILD THE RIGHT SYSTEM BEFORE YOU DRILL

Every well has different speed, measurement, formation-evaluation and directional requirements. MWD Solutions builds the technology package around the application instead of forcing the application around a fixed package.

FIND THE RISK FIRST

Pressure window.
Formation targets.
Directional demands.

BUILD FOR THE WELL

MWD/LWD, APWD, at-bit,
azimuthal and RSS,
configured to the application.

KEEP CONTROL TO TD

One accountable team
protecting data quality and
decision speed.

PUT US ON THE NEXT WELL
